

The background of the entire image is a repeating pattern of blue circles, each containing a white lightning bolt symbol. The circles are arranged in a grid that is slightly offset from one row to the next, creating a textured, woven appearance. A solid black rectangular box is positioned in the upper left quadrant, containing the text.

labelascheggia

beautiful music in limited edition

a musical editorial project

beautiful music is one that affects us the most, without classifications , categories or prejudices. nice to hear and be heard.

the limited edition is for those who love music on vinyl. for fans and not. for those who appreciate the work and care behind each project, unique and always different from the previous ones.

labellascheggia is a small scale artisan production in which music and art come together thanks to the experience and expertise of different subjects, sharing the same feelings.

labellascheggia produces handmade works on a small scale, blending together music and art thanks to the experience and to the competences of different people, who nevertheless share the same sensitivity. also, materials and printing techniques changes from each vinyl.

This way every single production turns out to be not only beautiful to hear, but also beautiful to watch and beautiful to touch.

The project

labellascheggia is a musical and editorial project which combines music and art in order to create new and unconventional editorial products.

labellascheggia is an independent label born to produce vinyls and editorial projects of emerging artists and to promote them in the area by organizing small events and showcases.

every produced musician, band or songwriter is associated with a graphic designer, an illustrator or a photographer for the creation of the cover and/or the packaging, and it combines in an exclusive way with the flavors and impressions of the record.

we commit the packaging process to professionals in the field of handicraft printing, with the idea to try for each work a different technique (Silk-screen printing, movable type printing, linoleography, etc.)
